Hemerocallis-Daylilies

WYNDHAM HAYWARD

Lakemont Gardens

Winter Park, Florida

ARABY

The modern daylily is a far cry from the old lemon lily and tawny Hemerocallis fulva, beautiful and useful though they were in their time. Recent hybridizers have added almost the hues of the rainbow to the daylily's color scheme, and now there are many variations of yellow and orange, gold and apricot, bronze, rosy-pink and red, even to nearly purple and black.

Our list contains a happy selection of some of the best of the standard varieties, and a goodly number of the new and most desirable types for the perennial planting. All are offered subject to supply and prior sales.

The daylily is grown with good success from the colds of Canada to the warmest tropics, and we will always be glad to offer any suggestions as to plantings in different climates. Few plants are at home under as many varying conditions as the Hemerocallis. They require only a good, well-drained garden soil of average richness, and plenty of moisture during the growing and blooming season. While they will survive severe drought, they cannot be expected to perform their best under unfavorable conditions.

Some of the Northern varieties are not entirely suitable for planting in warm climates, and possibly a few of the Southern kinds need thorough testing in Northern areas. We want you to be pleased with our daylilies, and feel sure you will be delighted with them and more than repaid for any extra trouble you take with them. We guarantee plants to live and grow under reasonable conditions and will replace any that do not survive, within one year of delivery, if advised of the full conditions and sufficient stock is on hand.

We are listing the daylilies in groups, according to their natural species and varieties, and those of leading breeders. Delivery in late summer and fall, also in early spring, occasionally at other times as required. We are especially interested in developing new shades and forms of red and pink colored daylilies and the darker tones in general. Most of these like some shade during the hot part of the day in summer or they will wilt.

1939 Daylily Introductions

(Wyndham Hayward, Lakemont Gardens, Winter Park, Florida)

Emperor Jones—(HD9)—deep mahogany red to purple black, lighter golden stripe in mid-petal. Free-blooming, vigorous, with clear golden throat. Stands sun well. Evergreen. Petals semi-compact and recurved; 6 inch flower, plant 3 to 4 ft. tall.

E. W. Yandre—(HD12)—vigorous evergreen fulvous-bronze shaded, on wide open petals, flaring type flower, gold throat, border, striping, and base color. Edges

creped. Bold, striking type. Six in. flower, plant 2 to 3 feet.

Lenore—(HC131)—Coppery-red compact flowers, seedling of H. fulva rosea. Slightly darker mid-zone marking. Even brownish rose coloring of petals. Needs some shade in hot sun. Five in. blooms, plant 4 ft. Evergreen.

Ramona— (HC216)—compact, cheerful brick-red flower, with light golden yellow base coloring. Deciduous. Seedling of Lemona X H. f. rosea. Neat and trimly decorative flower. Pleasingly recurved, symmetrical petals and sepals.

Minnie—(HC111)—Tiny, dark coppery-crimson-red to mahogany in darkshaded flower. Distinct deep crimson tone apparent. Lighter orange center. Wavy petals, darker midzone. Flowers 3 in.; plant 2 to 3 feet. Very unusual and showy

Sally——(HD10)——Pleasing light orange-gold with charming petal texture and compact, spreading type of flower. Wide petals and sepals, flower about 5 inches, plant 3 feet.

(Limited stock available at \$5.00 per plant)

PREVIOUS INTRODUCTIONS

Duchess of Windsor, (Traub), wide-petaled, full flowered beautiful pastel golden cream, very large, recurving petals, photograph available, \$5.00.

Araby (1937) illustrated April 1939 Gardeners Chronicle of America. on gold-dusted effect, medium to large full flowers, rather compact, free flowering, 5-6 in. flower. Pleasing and becoming popular.

Ralph Wheeler (1937) a delicate golden base dusted with a "smoky" fulvous

marking. Very pretty and striking under good culture.

De-Lovely (1938) large spreading petals of wavy, fluted shape, 6 to 7 in. flower, flaring wide-spread form. Wau-Bun seedling.

William Pelham (1937) interesting fulvous brown-marked type.

Florida (1938) light chrome yellow and rose blush combination of pastel effect, unusual and attractive; light yellow throat, darker eye zone. Flower 4-5 in., compact. Good multiplier. Seedling of Lady F. Hesketh X H. f. rosea.

Algeria (1938) strikingly marked dark brown to dark maroon, with dark eye zones and saffron throat. Rich, exotic appearance with spreading, recurved petals.

Nubiana (1938) low growing (2 ft.) dark chocolate red with light yellow stripe in mid-petal. Free flowering, handsome. One of the darkest varieties, 5 in.

Mrs. Herbert H. Dewey (1938) colorful fulvous red on light golden base and Seedling of H. fulva rosea. Open spreading flower, medium size, medium compact, 4 ft. scapes at maximum.

Cleo (1938) coppery rose-blush-pink petals of wide-spread type, broad and full. Medium compact. Six-seven in. flower at best. Plant 4 feet. Golden yellow throat and darker eye zone markings.

Antares (1938) deep orange red to purplish brick red, with fulvous black overtones. Four ft. with 5 in. flower; darker eye zones and yellow center. Very effective.

Osceola II. (1938) Richer color, similar to Antares, larger flower, more full

Othello (1938) Dainty, small-flowered red-fulvous type, to darker rose-grey; darker eye zone, plant 3 ft. tall; free blooming, many flowers to scape. 3 to 4 inch.

Old Rose (1938) unusual regularly-formed petals, wide and symmetrical on small to medium sized open faced flowers of a light fulvous red-to-ashes-of-roses coloring. Very compact and full flowers, 3 to 4 in. Needs some shade for best appearance on hot days.

Marconi (1938) Multiflora-type darkest red-orange, small flowers, vigorous plant up to 4 feet.

Rosita (1938) near carmine-crimson with coppery red tone. Medium f'ower. attractive color and good shape. Flowers 5 in.; plant 3 to 4 ft. Rather slender

spreading petals and sepals. Likes some shade, in hot weather.

Ginger (1938) showy brownish rose to Indian red-fulvous, with darker eye zones; gay and showy; 6 in. flowers at best; plant 3 ft.
